

GOIÁS

AGRICULTURE OVERVIEW

GOIÁS AGRICULTURE OVERVIEW is a publication of Goiás Government, provided by the Secretariat of Agriculture, Livestock and Supply in Goiás State (Seapa). The data collection and editing are under the responsibility of the Market Intelligence Management of the Superintendence of Sustainable and Rural Production, while the Communication Department is in charge of the graphic design, diagramming and reviewing. The photos in this edition are by the Brazilian Confederation of Agriculture and Livestock (CNA), Brazilian Agricultural Research Corporation (Embrapa), Freepik and Pixabay.

Agro Goiás

PRESENTATION

Whether inside or outside the farm-gate, agribusiness has shown its strength for the economic and social development of the State of Goiás. Agriculture activities are present in 246 cities in Goiás and contribute enormously to food production and supply, exports, employment, income, as well as industry and service support. All of it represents more resources in the market and increased access to education, security, leisure, among others. It is important to emphasize that agriculture impacts not only farm and nonfarm segments of society but also the economy.

Agriculture in Goiás also stands out in the national scenario. In 2020, the state was the third largest grain producer in Brazil in 2019/20 crop and ranked the leadership in crops such as sorghum, tomato and jabuticaba. In the Brazilian agribusiness podium, Goiás was the second largest producer of sunflower, sugar cane, garlic and cattle herd, and was the third one in the cultivation of soybean, corn, heart of palm, pequi fruit and natural rubber.

Considering all this importance, the Government of Goiás has created this tool of knowledge for the population and thus, provided by the Secretariat of Agriculture, Livestock and Supply in Goiás State (Seapa), Goiás Agriculture Overview has been launched. This publication, which is now in its second edition, brings updated data on Goiás agriculture and offers an outline on rural production in the state. This will promote knowledge enhancement about the food supply chain and assist rural producers to make decisions based on reliable data, numbers and information.

For the state government, Goiás Agriculture Overview allows better understanding of each crop and livestock production activity and to build public policies that can further develop agriculture in Goiás. We believe this report will both provide knowledge and to strengthen Goiás agriculture.

Enjoy your reading!

TIAGO MENDONÇA

State Secretary of
Agriculture, Livestock
and Supply

LIST OF ACRONYMS

CEASA: Goiás Supply Centers S.A

CONAB: National Supply Company

FOB (Free on Board): shipment term used to indicate whether the seller or the buyer is liable for goods during shipping.

IBGE: Brazilian Institute of Geography and Statistics

MAPA: Ministry of Agriculture, Livestock and Supply

GLOSSARY

Soybean Complex: products resulted from soybean cultivation - grain, soybean meal and soybean oil.

Gross Value of Agricultural Production: it represents the performance development of crops and livestock over the year and corresponds to the gross income inside the farms.

NOTES

1. For methodological reasons and to preserve the anonymity of farmers, production data in cities with less than three farms of a given crop are omitted from the survey.

2. The Ministry of Economy retroactively updates its database; therefore, the information listed may differ from the surveys made at later dates.
