Boletim nº: 0027

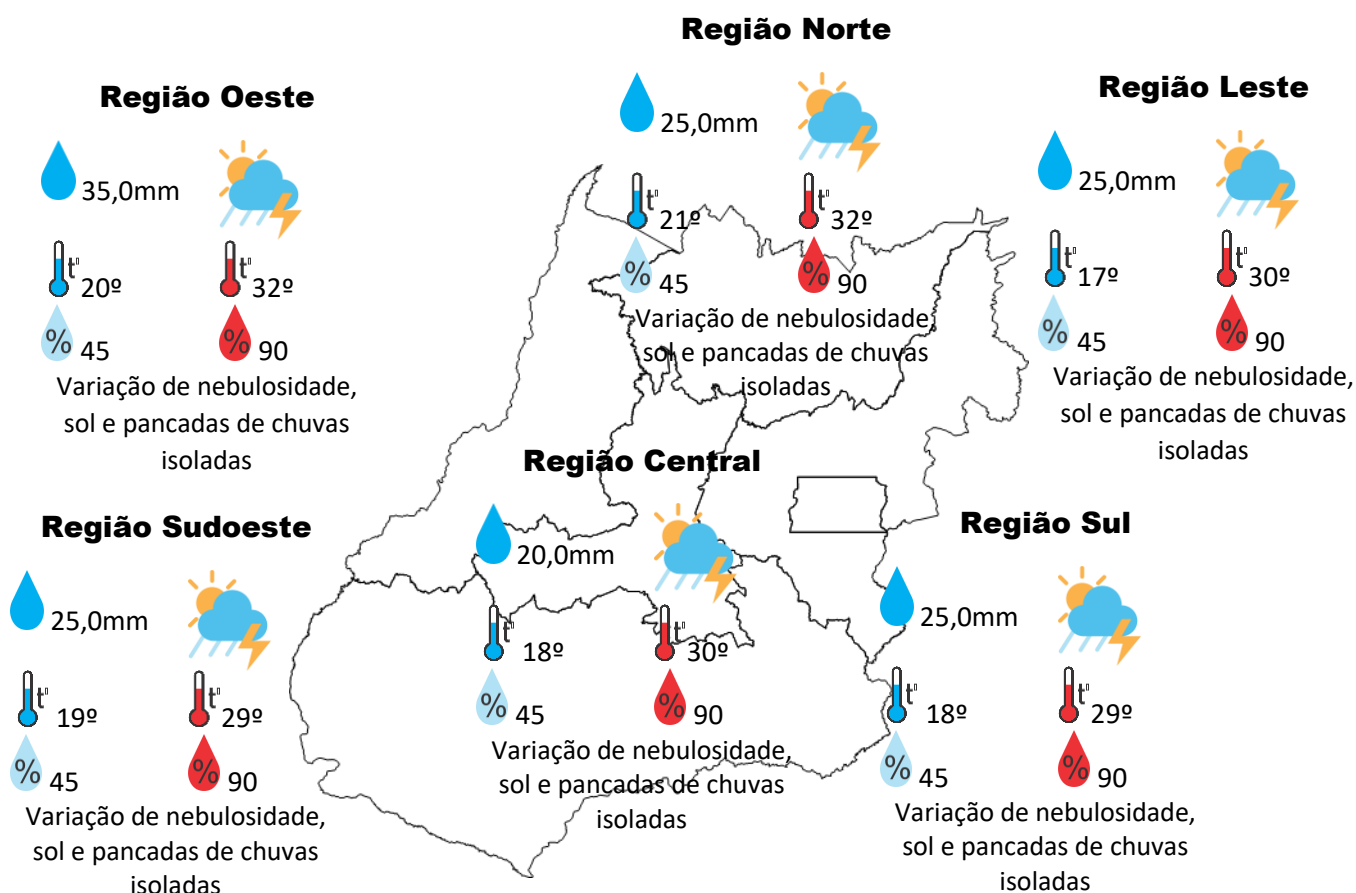

Elaborado na data: 01/02/2022

Previsão para data: 02/03/2022

### Informações do Tempo para o Estado

**Quarta-feira** a zona de convergência do atlântico sul – ZCAS perde intensidade, mas devido ao espalhamento de nebulosidade sobre o Estado que combinado com calor irá favorecer a formação de áreas de instabilidade em várias regiões de Goiás, com isso, teremos pancadas de chuvas isoladas que podem vir acompanhadas de rajadas de vento e raios.

**Capital:** Variação de nebulosidade, sol e possibilidade de pancadas de chuvas isoladas, temperatura máxima podendo chegar aos 29°C e umidade relativa do ar variando entre 45% a 90%, o nascer do sol será às 06:06hs e o pôr do sol às 18:55hs.
