Boletim nº: 0113

Elaborado na data: 11/05/2023

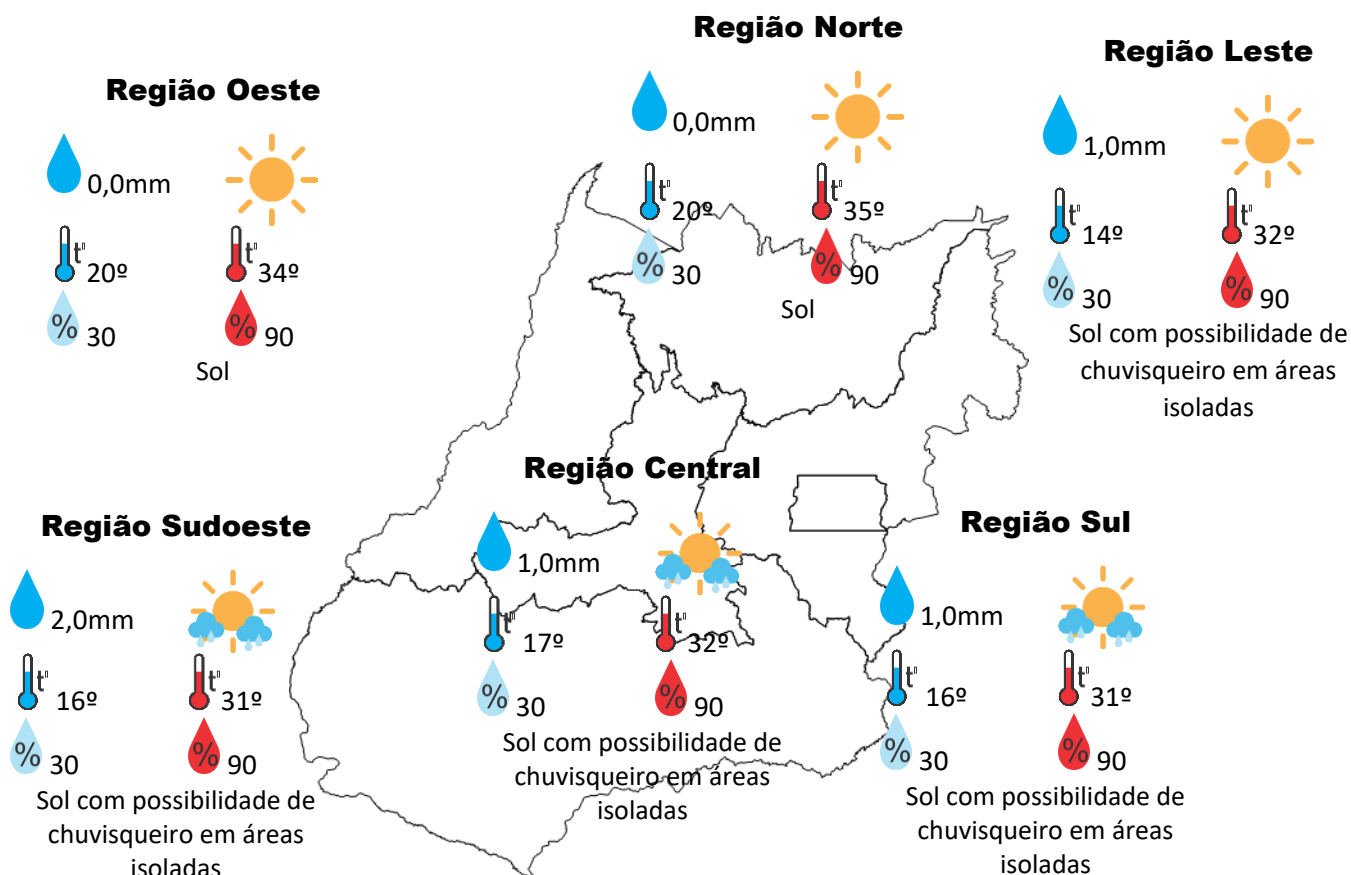

Previsão para data: 12/05/2023

Informações do Tempo para o Estado

Sexta-feira, ainda com predomínio de sol em todas as regiões de Goiás, as temperaturas serão amenas pela manhã e elevadas no período da tarde. O avanço de uma frente fria pela costa do Brasil na altura do Estado do Espírito Santo, auxilia no transporte de umidade da região norte do país sobre nosso Estado, com isso teremos a possibilidade de chuvisqueiros em áreas isoladas

Capital: Sol com possibilidade de chuvisqueiro em áreas isoladas e temperatura máxima podendo chegar aos 30°C e umidade relativa do ar, variando entre 30% a 90%, o nascer do sol será às 06:32hs e o pôr do sol às 17:54hs.

Prognóstico para o Estado neste final de semana: teremos predomínio de sol em todas as regiões de Goiás, temperaturas amenas pela manhã e elevadas no período da tarde, gradativamente a umidade relativa do ar no período da tarde começa a entrar em declínio.
